

Bedingung

```
graph TD; Bedingung -- True --> Anweisung_1[Anweisung 1]; Bedingung -- False --> EmptyBox[ ]; style EmptyBox fill:none,stroke:none;
```

The diagram is a flowchart with a rectangular box at the top labeled 'Bedingung'. Two diagonal lines originate from the bottom corners of this box and meet at a central point. From this point, a horizontal line extends to the left, ending at the label 'True', and another horizontal line extends to the right, ending at the label 'False'. Below the 'True' label, a vertical line descends to a rectangular box labeled 'Anweisung 1'. The area to the right of the 'False' label is empty.

True

False
